Re: Laboratory Permeability Testing
Zone I, II and III Retention Ponds
UCD Modernization Project
Copperton, Utah

Gentlemen:

Transmitted herewith are results of laboratory testing of clay liner materials sampled from the Zone I, II and III Retention Ponds. Samples were obtained by pushing 3 inch diameter thin wall Shelby tube samples with a track mounted backhoe. The samples were then shipped to Geotechnical Resources, Inc. for testing. Locations of the test samples are shown on the attached site plans.

Should there be any questions concerning this letter, we would be pleased to discuss them with you.

Respectfully submitted,
Sargent, Hauskins & Beckwith Engineers

By 
Darrel L. Buffington, P.E.
